RE: Cross Connection Control Program

XXXX,

The purpose of this letter is to remind you that the backflow prevention assembly installed on your property is due for its annual testing. This important testing of your backflow prevention assembly will help protect the public water system from “cross connection” and contamination of drinking water. This annual testing is required by Washington State code WAC 246-290-490 and Marion Water’s Cross Connection Control Program.

Testing must be completed by a Backflow Assembly Tester (BAT), certified by the Washington State Department of Health. A list of certified Washington State BAT testers can be found at <https://wcs.greenriver.edu/bat/hire-a-bat/>. A successful test needs to be completed and the report filed with Marion Water no later than **10/31/2024**. If an assembly fails the initial test, the necessary repairs should be made and the assembly re-tested by the same due date.

A passing test must be completed and submitted prior to the due date to avoid fines of up to \$500.00 and water shut off

Please send completed test to either of the following:
